

Tired of bulky books?

inlingua Flex-E-Book® turns your tablet into an interactive library.

inlingua Flex-E-Book® is the digital alternative to our traditional course books. Arrange your personal library with the inlingua app on your tablet and enjoy the freedom of not carrying books.

Functions

The fully integrated listening comprehension exercises make additional audio CDs obsolete. Many exercises also have an integrated correction function in addition to the solutions chapter. You can navigate directly to your current unit or set a bookmark to return to a previous page.

Installation

The installation is as easy as the handling:

1. Order the book at our school
2. inlingua will send you a download code
3. download the free "inlingua Flex-E-Book" app in your app store.
4. Open the app, insert the code of your Flex-E-Book in the top left corner and press "download e-book". The download starts automatically.

Flex-E-Books were created for the use on tablets running on Android or iOS. The e-book can be installed on one device only.

Structure and content

Structure and content are in accordance with the corresponding inlingua materials. Flex-E-Books are therefore a full-fledged alternative to our course books or may be used as additional study material when travelling.

Prices

The prices are the same as for our regular course books, between CHF 50.- and CHF 100.-.

Essential features

- fully integrated listening exercises
- correction function for answers
